

Extension tasks are regularly set on Satchel:One for students to complete every term. These aren't compulsory but highly recommendable to allow students to broaden their knowledge and understanding and deepen interest in the subject. The tasks are categorised into "investigation" and "creative" to enable students to develop a range of skills. Students have to carry out some independent research and then submit their task (via email) to their teacher. The tasks set are of varying difficulties to appeal to all types of students.
